BLOCK FIXING MR - 58

PRODUCT DESCRIPTION : GVT Block Fixer is a factory prepared blend of carefully selected raw materials, Portland cement, graded aggregates and polymers. Designed for use with water to produce high strength thixotropic mortar ideal for laying aerated light weight concrete, fly ash bricks, cement hollow blocks, cellular concrete blocks or smoothing over the block work surface in layers of up to 12mm thickness that meet and exceed the requirements of National and International Standards.

APPLICATION

For interior and exterior use for preparing thin bed block mortar for AAC and cellular concrete blocks.

ADVANTAGES

Long working time | No curing required after block work is done | Improved adhesion between two blocks Fast & economical

COVERAGE

Approximately 100-130sq.ft. per 40kg bag. Coverage is based on smoothness and evenness of the substrate, size of blocks used and the thickness of mortar used. A general guideline for coverage of mortar is given when used with 25% water added to powder.

NOTE : Coverage is based on the block size of 600mm* 200mm* 100mm

SURFACE PREPARATION

Before starting to grout, remove debris in grout joints and lightly sponge the tile surface to remove dust and dirt. Do not clean tiles with acid cleaners. In case acid cleaners were used to clean the tiles, ensure to wash the area with plenty of water before commencing grouting.

MIXING

Empty entire contents of Stiffoxy-310 Stain free Grout Part "A" and Part "B" container into a clean mixing pail. Mix with a margin trowel or a slow speed drill mixer until liquids are completely blended. Add at least of stiffoxy-310 Part "C" Filler Powder and mix to a uniform consistency. Add the remaining filler powder and mix to achieve a stiff mix to work into the joints. Immediately pour entire contents of bucket onto working area. Use a plastic sheet as a drop cloth. Use standard epoxy grouting techniques to work with Stiffoxy-310 Grout into tile joints. Stiffoxy-310 Grout can also be applied with a caulking gun. Be sure all grout joints are packed full. Remove as much excess material as possible before initial cleaning with grout float. Do not leave excess grout on the face of tiles.

CLEANING

Remove excess grout from the face of the tiles with the edge of the grout float. Hold the float at a 90° angle and pull it diagonally across the joints and tile to avoid pulling out the material.

INITIAL CLEANING

After 30-45 min of the application of the grout scrub the surface of the tile & joint with clean water and scrubber provided to remove any excess grout. Then take a clean thick white towel and drag across the tile to remove any residue.

FINAL CLEANING

Within 24 hours do a second cleaning with normal soap detergent to remove any haze from the tile.

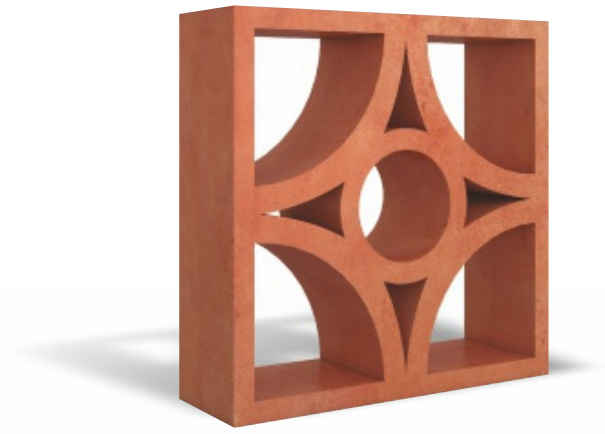
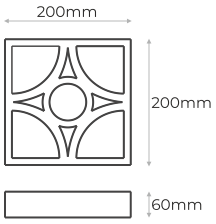
CAP JAALI

Size: 200x200x60mm
Weight: 2.6 kg.
Colour: Natural Terracotta

Back to basics.

The Cap Jaali is a classic example of how much impact you can create with 3D tiles. It's the confluence of complex curves and straight edges that tease your imagination to do more . What you get is a solid style statement that is hard to miss and simply impossible to ignore. Cap Jaali makes for compelling designs and incredible patterns. The rhythmic elevation sets the tone for beautiful décor. Cap Jaali is our version of ' see it to believe it'.



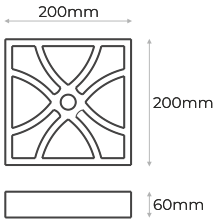


LOTUS JAALI

Size: 200x200x60mm
Weight: 2.3 kg.
Colour: Natural Terracotta

Refreshingly different.

There's a lot you can do with Lotus Jaali. A triangle divided in three is just what it is to look at. But when you throw in some curves, you get Lotus Jaali our most coveted tile. The beauty of Lotus Jaali is that it is open to interpretation. So three tiles come together to form a triangle and when the triangles come together they form a large hexagon. These lead to some really striking patterns that are truly every designer's delight. If you wish to create something really unique, the Lotus Jaali is for you.

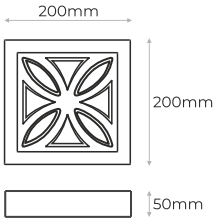


FLORA JAALI

Size: 200x200x60mm
Weight: 2.3 kg.
Colour: Natural Terracotta

An artist's impression

The second member of the hexagon family. Flora Jaali pushes the envelope for good design. It gels effortlessly with multiple orientations adding more drama per square foot. Its edges give it a distinct persona that's impossible to ignore. What's best about Flora Jaali is that you don't have to work very hard to spruce up a space. All you need to do is choose Flora Jaali and make way for magical transformations.



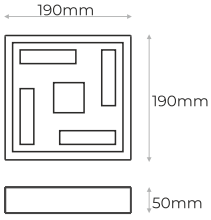
FLORET

Size: 200x200x50mm
Weight: 2.8 kg.

Best new things

Adds a decorative dimension to architecture, As well as providing privacy and protection but with a feeling of openness and weightlessness.

Florest are handmade from White Sand & Cement.



BARON

Size: 190x190x50mm
Weight: 2.7 kg.

Heavenly lighting

Whether inside or outside these blocks will appeal to your sense of design. We love how they add a touch of sophistication to any space without overwhelming with patterns. The best thing about them is that they're subtle but not understated because there is always a stand out quality with every patterns which makes them more exciting and also very cheerful.
